

ABSTRACT

A dispenser and method for storing and dispensing a plurality of separably joined wipes are taught. Such comprise a cartridge comprising a bottom wall and at least one side wall extending from the bottom wall, the walls connected together to define a chamber and an opening in the chamber. A cover is removably fastenable to the top portion of the side wall, the cover and cartridge cooperating to seal the plurality of separably joined wipes in the chamber. An elongated dispensing passage is disposed adjacent the top portion of the side wall wherein wipes from the plurality of separably joined wipes can be dispensed from the chamber by the wipes passing directly between the cover and the top portion of the side wall and out the dispensing passage when the cover is fastened to the cartridge.
